DETAILED ACTION

1. This office action is in response to applicant's amendment filed 8/29/05. The finality of the previous office action is henceforth withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11, 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshida et al., U.S. Patent 4,958,546.

Yoshida discloses the same invention as claimed including, e.g., a blade back (1) and a toothing (3,5,7,9 see Figure 12) extending along a lower edge of the blade back. Yoshida discloses three successive groups of integral teeth such as group 1 (tooth 3); group 2 (tooth 13) and group three (teeth 5 and/or 7). The tooth in group one has a tooth width, as measured at the top edge of the teeth, which is different from the width of groups 2 and 3; and the width of group two is different from groups 1 and 3. Yoshida discloses the use of recesses (11) alternating on both sides of the blade such that they are offset in the longitudinal direction of the blade. It should be noted that the claims are not specific to any number of teeth in any of the groups.

As to claim 13, the recess as shown in Figure 6a extend from the lower edge side to a distance spaced from the lower and upper edges.

Art Unit: 3724

As to claim 15, the recess as shown in Figure 6a are cut into the blade back and the tothing before a transposition of the saw teeth (the recesses are between teeth).

Allowable Subject Matter

4. Claims 12 and 14 appear to be allowable over the prior art of record.
